Spatial Analyst Layer: geo3.jpg - Band\_1

3D Analyst Layer: geo3.jpg - Band\_1 Georeferencing Layer: geo3.jpg - Band\_1

Editor Task: Create New Feature Target:

**Layers**

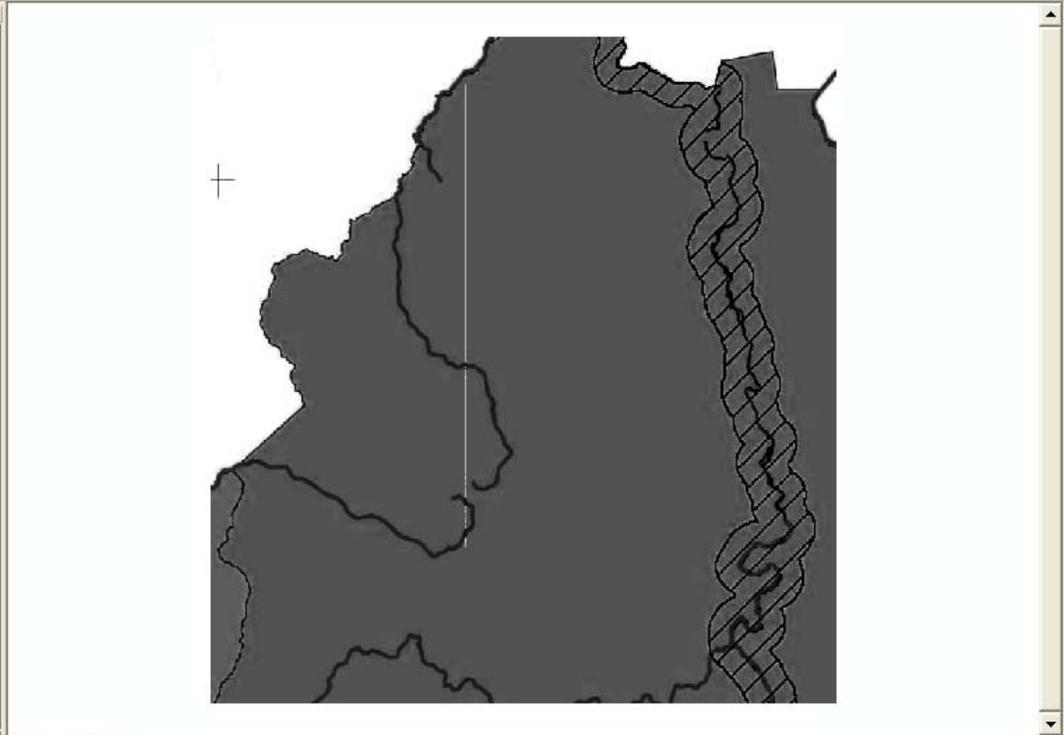

- linha
- Extract\_1
  - Value
    - High : 156
    - Low : 92
- geo3 - Band\_1
  - Value
    - High : 255
    - Low : 0
- geo3.jpg - Band\_1
  - Value
    - High : 255
    - Low : 0

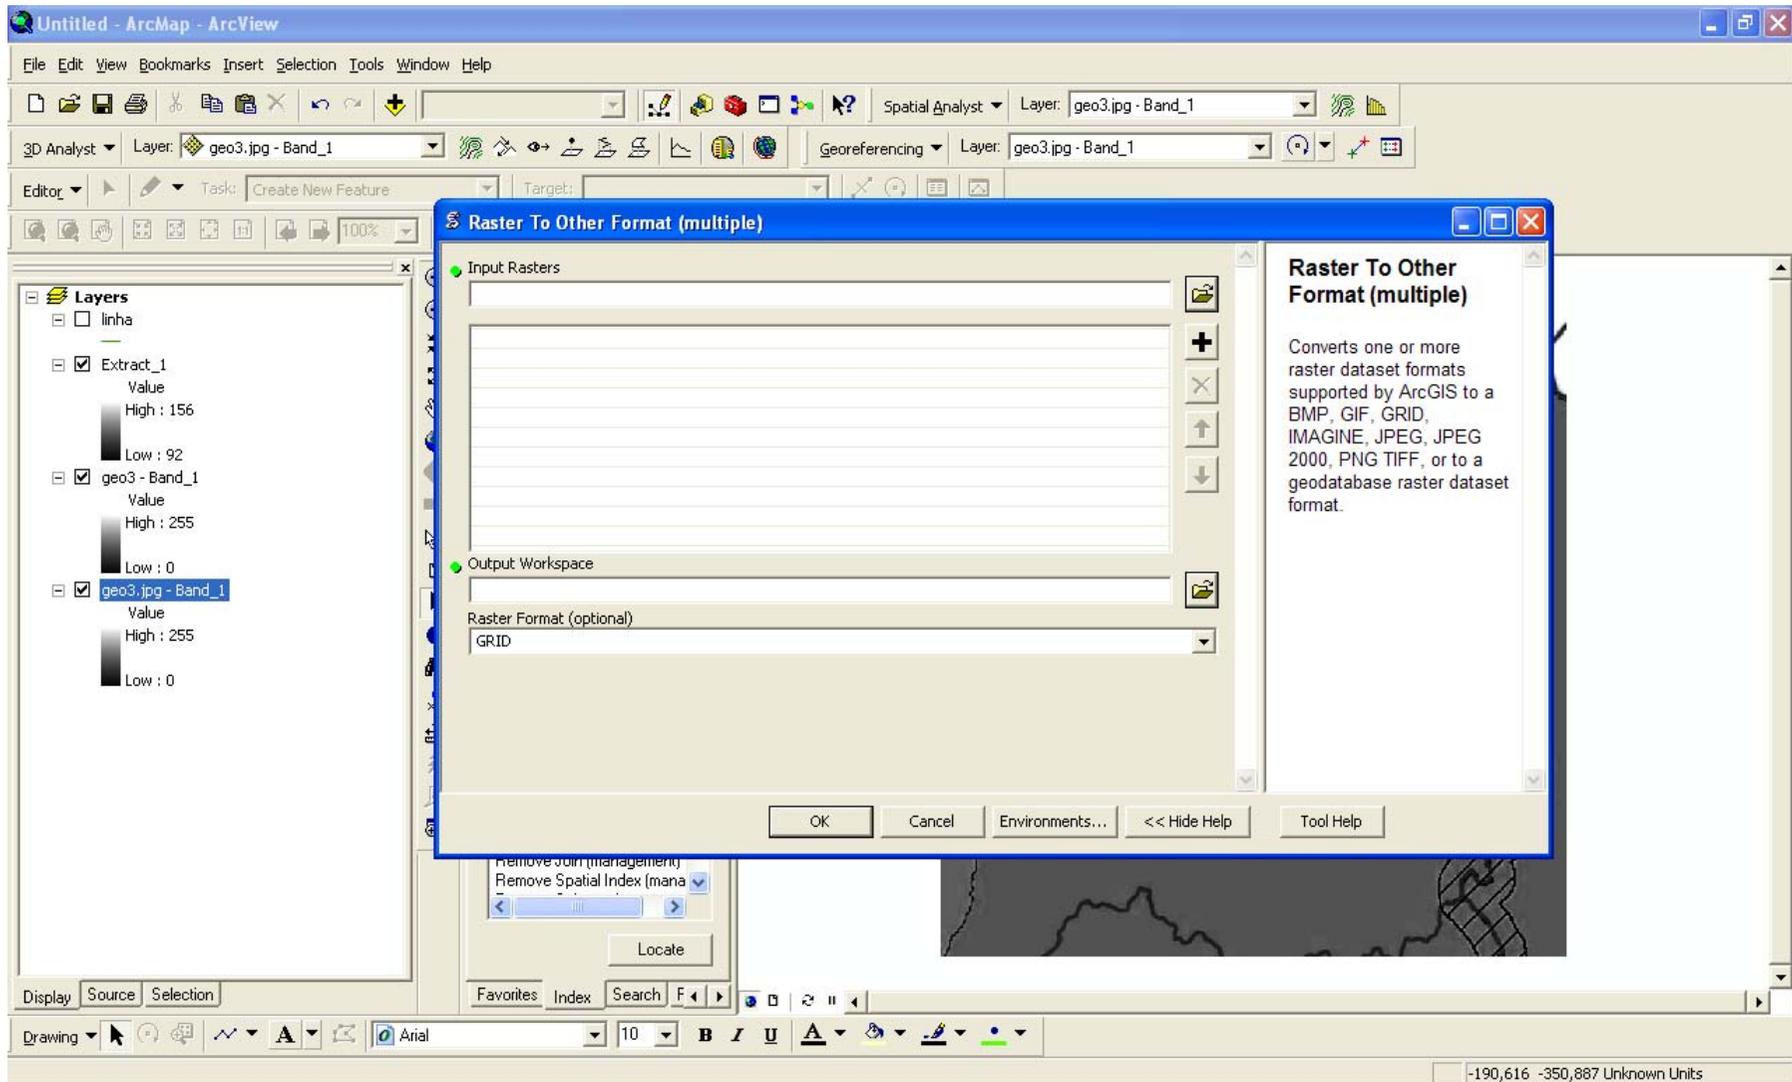

Type in the keyword to find:

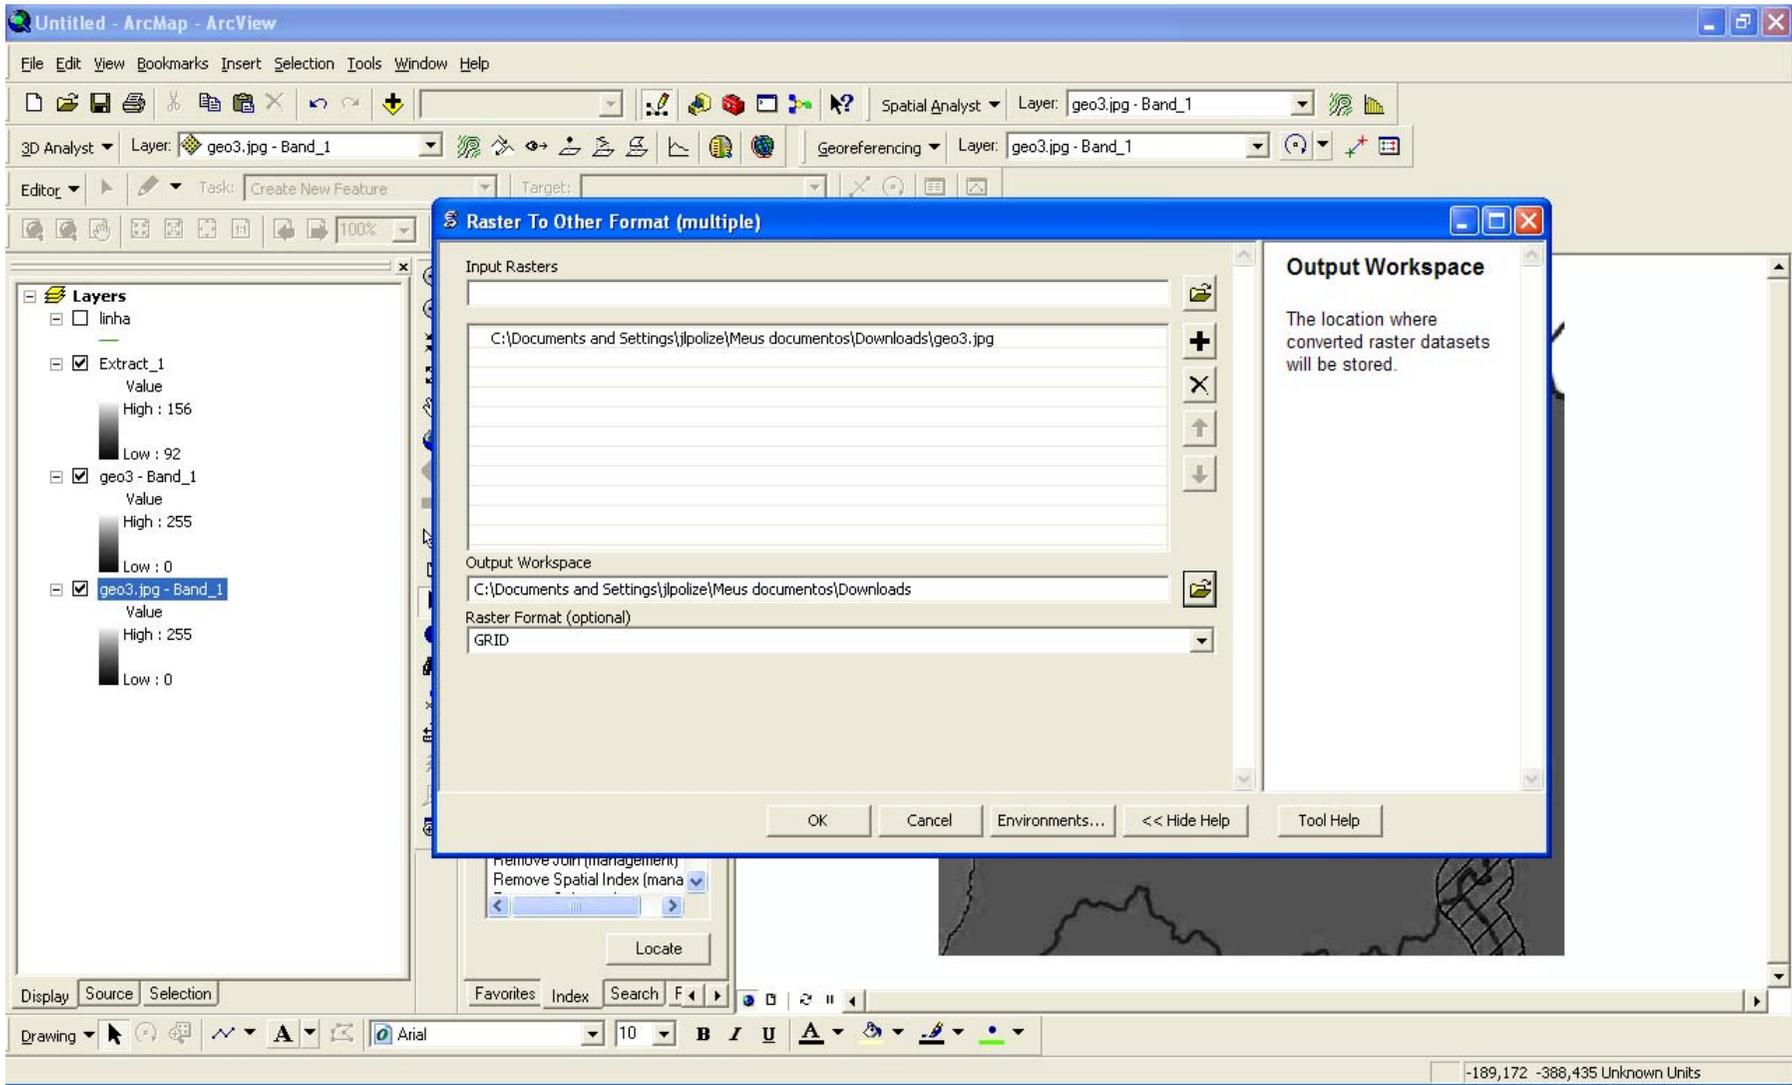

raster

- Raster Catalog To Raster Da
- Raster Compare (managemer
- Raster Domain (3d)
- Raster to ASCII (conversion)
- Raster to Float (conversion)
- Raster To Geodatabase (mul
- Raster to NetCDF (md)
- Raster To Other Format (mult
- Raster to Point (conversion)
- Raster to Polygon (conversio
- Raster to Polyline (conversio
- Raster to TIN (3d)
- Rebuild Address Locator (ger
- Reclass by ASCII File (3d)
- Reclass by ASCII File (sa)
- Reclass by Table (3d)
- Reclass by Table (sa)
- Reclassify (3d)
- Reclassify (sa)
- Region Group (sa)
- Rematch Addresses (geocod
- Remove Attribute Index (man
- Remove Domain From Field (
- Remove Feature Class from 1
- Remove Join (management)
- Remove Spatial Index (mana

Locate

**Raster To Other Format (multiple)**

Input Rasters

- C:\Documents and Settings\j\polize\Meus documentos\Downloads\geo3.jpg

Output Workspace

C:\Documents and Settings\j\polize\Meus documentos\Downloads

Raster Format (optional)

GRID

The location where converted raster datasets will be stored.
